

Putting

- If your putting technique is good,
But you do not have good speed nor the right read,
Then the ball can't go in the hole.

- If your putting technique is good,
And your speed is good,
But not your read,
Then the ball can't go in the hole.

- If your putting technique is not good,
And neither are your speed and read,
Then the ball can't go in the hole.

- If your putting technique is not good,
but your speed is good,
and your read is not,
Then the ball can't go in the hole.

In all these cases, without the right read you don't have any chance of making putts. Now we fill in the above with a good read!

- If your putting technique is good,
But you do not have good speed nor the right read,
Then the ball can't go in the hole.

- If your putting technique is good,
And your speed is good,
But not your read,
Then the ball can't go in the hole.

- If your putting technique is not good,
And neither are your speed and read,
Then the ball can't go in the hole.

- Even if your putting-technique is not good,
But your speed and read are good,
Then the ball will go in the hole

We see immediately an improvement of at least 50%, with only having the correct read.

Aimpoint green reading avoids problems with your read and you will make more putts. Improve your putting and attend an Aimpoint Green Reading Clinic.
